TERMS OF SALE

Members are referred to the Auction Operating Code.

Although every effort is made to describe each lot accurately, no warranty is given, and neither is the Auctioneer, Auction Committee, nor the vendor responsible for any lot or faults in any lot. No sale shall be invalid and no person shall have any claim against Ruahine Auction or its staff because of faults or mis-descriptions. All descriptions of ammunition and firearms, whether antique or modern are for collector's guidance only and do not refer to their safety or suitability for use. For German & Nazi items – due to the large number of reproductions, including some apparently made from original moulds and dies, no guarantee of authenticity can be given

It is the responsibility of all purchasers and vendors to obtain the necessary permit(s) to procure before any endorsed lots can be uplifted or reclaimed.

The Highest Bidder shall be the buyer at the "hammer price" and any dispute shall be settled at the discretion of the Auction Sub-Committee. Commission will be charged at 10% plus gst vendor and 10% plus gst buyer's premium. Bidders attending the auction will be required to pay for lots by cash, EFTPOS or Credit Card upon receipt of an invoice. (All Credit Cards will incur a 4% surcharge) Lots can be removed only after presentation of an official receipt to the despatching officers. It will be possible to settle accounts and uplift items at any time during the proceedings, provided a few minutes notice is given to the cashiers.

There will be an Arms Officer in attendance all day

POSTAL BIDDING

Using the Postal Bidding Form, fill in your name, address, Firearms Licence number and endorsements, the lot number and maximum bid for each lot, (**Please use whole dollars only**) and you can either post or email it, to arrive no later than midnight Thursday 1st September 2022. Posted - Ruahine Auction 96 Piripiri Road RD 7 Dannevirke 4977 or by Email to ruahineauction@hotmail.co.nz

If identical bids for any lot are received, the first bid received will take precedence. The Auction Sub-Committee will not accept instructions for changing bids depending upon bidder's success in earlier lots. In the event of a bid being received from the floor equal to the highest postal bid, the postal bid shall take precedence. Successful postal bidders will be notified preferably by email and or post and will be asked to forward by a specified date the cost of lot(s), plus P&P. Failing this the buyer's rights will be forfeited. Postal bidders can pay with online banking or a bank transfer.

The function of the cardless credit card facility is no longer viable.

Please ensure that your delivery address on the Postal Bidder form is the final one for the delivery of the items and that it includes your phone number.

Ammunition & Firearm Purchases – Under the 1983 Arms Act all postal purchases of firearms and ammunition must be approved by your local Arms Officer on the approved form (43a). The police will then forward the form to our Arms Dealer. Dangerous Goods provisions also apply to the transport of ammunition and powder and significant extra costs are involved (payable by you the purchaser). One way round these provisions is for you to arrange for someone attending the auction to buy on your behalf and carry under the provisions of their own licence.

PLEASE NOTE:

POSTAL BIDDERS PARCELS WILL BE CARRIED BY MAIN FREIGHT. These parcels will be dropped to your nearest Main Freight Depot unless otherwise advised

- 295 Revolver:** .32 Tipping & Lawden Self Extracting Solid Body Revolver. Thomas Patent. No 779 and No 1289. Top of frame marked Retailer S Jackson. Nottingham, the Thomas patent revolver is a solid frame design with a longer than usual frame. This allowed the cylinder to slide forward about an inch. It was loaded in a conventional manner through a loading gate on the right side of the frame, in order to unload the revolver a small spring at the lower front of the frame was depressed allowing the shooter to use the large bulbous lug under the barrel so as to rotate the barrel through 180 degrees. This freed the barrel to be drawn forward which pulled the cylinder forward at the same time. A stationary star shaped extractor at the rear of the frame held the cartridge by their rims. After the cylinder was pulled forward any spent cartridges to be shaken loose. Unfired shells stay in place as the exposed bullets are within the chamber. To close the action the barrel was simply pushed back into position and rotated clockwise to lock the action closed. The small wing shaped screw at the upper rear left of the frame was both a hammer locking and a de-cocking device. This revolver has a 4 1/8" barrel with very good bore, solid frame with black paint of the period about 60%. Wooden chequered grips with steel base.
